FILE 60

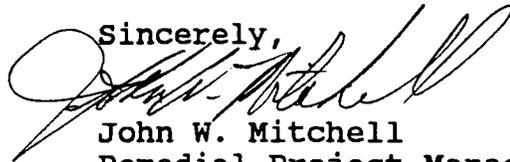

RE: Main Base, Contamination Assessment Report Addendum,  
Building 3026  
FDEP #488840202

Dear Mr. Ugolini:

I have completed the technical review of the Main Base Contamination Assessment Report Addendum dated March 1996 (received March 22, 1996), submitted for Building 2036. I found the document submitted to be adequate to meet the contamination assessment requirements of Rules 62-770.600 and 62-770.630, Florida Administrative Code (F.A.C.) except it was not signed and sealed by a professional geologist. Upon receipt of a signed and sealed professional geologist certification, I will approve the CAR Addendum. After which you must submit a Remedial Action Plan (RAP) in accordance with Rule 62-770.700, F.A.C. The RAP should include remedial actions for contaminated soil and groundwater.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell  
Remedial Project Manager
