Regional Administrator (Attn: Marvin Young)
Environmental Protection Agency, Region IX
215 Fremont Street
San Francisco, California 94105

Gentlemen:

Navy Assessment and Control of Installation Pollutants (NACIP) is the Navy's effort to identify and mitigate problems of environmental contamination at shore facilities resulting from the storage, use and disposal of hazardous materials. My letter of 17 May 1983 forwarded a copy of the initial assessment study for the Naval Air Station, Alameda and indicated that follow-up monitoring for Sites 1 through 7 would be performed as part of a confirmation study by the Western Division, Naval Facilities Engineering Command (WESTNAVFACENGCOM).

Please find enclosed a copy of the confirmation study for Site 1, prepared by Harding-Lawson Associates, under contract to WESTNAVFACENGCOM. The confirmation study for sites 2 through 7 will be carried out during the current fiscal year.

Should you have any questions concerning the NACIP Program or the enclosed study, please contact my Environmental Protection Officer, Mr. Joseph Shandling, telephone (415) 869-4731.

Sincerely,

D. G. RICHMOND
Captain, USN
Commanding Officer
