Berkeley, CA 94710

Subj: PROPOSED ADDITIONAL FIELD WORK FOR RI/FS, NAS ALAMEDA

Dear Ms. Lasky:

During the June 2, 1992 meeting between the Navy, the Department of Toxic Substances Control (DTSC) and the Regional Water Quality Control Board (RWQCB), personnel from the DTSC and the RWQCB provided input on the Remedial Investigation and Feasibility Study (RI/FS) at the Naval Air Station (NAS), Alameda.

Based on discussions with the DTSC and the RWQCB, the Navy hereby proposes the following additional field tasks for the RI/FS:

- a) Collection of additional groundwater samples for chemical analysis from existing monitoring wells at NAS Alameda.
- b) Analysis for TDS in addition to the other proposed analyses for these additional groundwater samples.
- c) Installation of wells in the next deeper aquifer at locations where groundwater contamination has been observed in previous sampling and analysis.
- d) Installation of wells along the eastern boundary of NAS Alameda to determine if contaminated groundwater is flowing to the east, off-base.
- e) Use of field screening techniques (soil, groundwater, soil gas) to identify potential non-point sources of contamination (industrial waste lines, storm sewers), and to evaluate the extent of previously recognized soil contamination.
- f) Performance of additional work as recommended in the Phases 2B and 3 Data Summary Report for sites 4, 5, 6, 7A, 7B, 8, 10A, 11, 12, 14 and 15.

Please provide your comments for the proposed additional field work as soon as possible so that the Navy may begin contractual actions for the additional work. If you have any further questions regarding this matter, the point of contact is Mr. Wing Wong, Code 1811WW, (415) 244-2537.

Sincerely,

Original signed by:

LOUISE T. LEW  
Head, Installation Restoration Section
