Dear Ms. Lasky:

This letter is in response to your and the Regional Water Quality Control Board comments of July 6, 1992. All of the technical issues (comments 1, 2, 3, 5, 6, and 8) as well as the editorial ones (comments 4 and 7) are concurred with.

In addition to the issues identified in your letter, the Navy will revise the analytical method used for mercury analysis. This change was requested in comments received from the National Oceanic and Atmospheric Administration.

If you have any questions regarding our responses to your comments, please contact Mr. Gary J. Munekawa, Code 1811GM, (415) 244-2524.

Sincerely,
