Subject: Re: Draft Geotechnical Feasibility Study Report

Hi Claudia:

Regional Board staff will defer to DTSC on the geotech report.

You will not see a comment letter from us.

Thanks for checking and have a great day!!

Judy

Hello All,

I would like to follow up with each of you to see if you had any comments on the Draft Geotechnical Feasibility Study Report that was provided to you last November for your review. I have recently received comments from DTSC. Comments were expected by this week and I was wondering if EPA and RWQCB had anything else to add? We would like to get the Draft Final out to you by the early part of February (depending on the depth of comments received).

Mark, check with Karla as a copy should have been sent to her.

Thank you!

Claudia Domingo
