RE: Contamination Site NP32 - Crows Landing Naval Auxiliary
Landing Field, Crows Landing, CA

The Hazardous Materials Division has reviewed the work plan of your consultant, PRC Environmental Management, Inc. (3/10/1993), to survey all of the existing monitoring wells to a common elevation, and investigate current irrigation practices and its possible influences on local groundwater flow.

The work plan is approved as written. Forty-eight hours notice to the Division is required for all site activities. Please call me at (209) 525-4150 if you have any questions.

ROBERT FOURT
GEOLOGIST
Hazardous Materials Division
