**Subject:** RWQCB Central Valley Region, Fresno Branch Office letter dated 25 June 2003, Review of Draft Engineering Evaluation/Cost Analysis (EE/CA), IRP Site 11, NASA Crows Landing Flight Facility, Stanislaus County

Hello Dale and Dane,

This message is intended to provide a preliminary response to two of the three comments presented in the subject letter that we received on 7 July 2003. We will be providing a formal response soon.

The subject letter states that the RWQCB concurs with the Navy's recommended response action - the excavation and removal of buried waste and debris from Site 11 - and the subject letter requests revisions to the EE/CA based upon three review comments.

Comment 1 pertains to a citation from Title 40, Code of Federal Regulations (CFR) in Section 3.4 of the text. The text of Section 3.4 will be revised for the correct citation.

Comment 2 pertains to Applicable or Relevant and Appropriate Requirements (ARARs) prescribed by Title 27 of the California Code of Regulations. We propose to evaluate this comment following the receipt of review comments from the California Department of Toxic Substances Control and the California Integrated Waste Management Board. As of 16 July 2003, we have not received review comments on the EE/CA documentation from these agencies.

Comment 3 pertains to the monitoring well, 11-MW-03(S) at Area of Concern (AOC) 5. The Navy plans to protect this well to the extent practicable during the implementation of the removal action. If the well is accidentally damaged, the Navy will make the appropriate repairs.

Thank you very much for participating in the development of the Site 11 EE/CA documentation. We appreciate the prompt review of the Draft EE/CA by your office.
