U.S. Department of the Interior
Bureau of Land Management *Reclamation*
2800 Cottage Way
Sacramento, California 95825

Attention: Mr. Billy Martin
Regional Director

Gentlemen:

In December of 1953, the Navy issued the enclosed Permit NOy(R)-48065 to the Department of the Interior authorizing use of 6.10 acres of land at the Naval Auxiliary Landing Field, Crows Landing, California for drainage purposes.

Article 4 of the permit requires the Permittee to "...maintain the channel and land covered by this permit against erosion and shall keep such channel and land free of obnoxious growth and rodents."

At the present time we are having an erosion problem that is directly related to the frequency of maintenance performed on the drainage channel. Sediment is being allowed to collect and remain in the channel's sediment basins impairing their effectiveness. Subsequently, sediment and debris are swept downstream to clog other portions of the channel and to fill Navy constructed ditches and ponds. The problem has now progressed to where immediate corrective action is needed. Perhaps just increasing the frequency of maintenance efforts will alleviate the problem.

At any rate, we would appreciate an on-site meeting of representatives of your Bureau with representatives of this Command to determine the cause of, and to fix responsibility for correcting, the problem. If you agree to such a meeting, arrangements can be made by contacting either Mr. Julius Victor, telephone (415) 877-7613 or Mr. John Brice, telephone (415) 877-7608, of this Command.

Your cooperation in this matter will be appreciated.

Sincerely,

W. H. HERMES
Realty Officer, Real Estate Division
By direction of the Commanding Officer
