**FINAL NO FURTHER ACTION (NFA) MEMORANDUM, INSTALLATION
RESTORATION PROGRAM SITE 11A, CURRENT AND FORMER SEWER SYSTEM,
NASA CROWS LANDING FLIGHT FACILITY, CROWS LANDING, CALIFORNIA**

Dear Mr. Sullivan:

Thank you for the opportunity to review the above referenced NFA decision document. The purpose of the document is to support the U.S. Department of the Navy's (DON) decision to recommend a NFA status for groundwater and soils at IRP Site 11A. Site 11A is comprised of the former and current sewer system and associated pipelines, basins and treatment facilities.

The Final NFA document, as well as the May 2006 Final Technical Memorandum, details the investigations that have been conducted at Site 11A from 1997 to 2004. Results of these investigations show that detected metals are within background and detections of volatile organic compounds and semi-volatile organic compounds are below risk screening levels. On June 20, 2006, DTSC signed a letter concurring with the Technical Memorandum's NFA recommendation.

Based on our review of the above referenced documents, as well as the completion of the public review period, DTSC concurs with the DON's recommendation of No Further Action for IRP Site 11A.

Mr. James Sullivan
