Subj: Project Plans, Unexploded Ordnance Construction Support, Oversight of Dredging Activities at Little Salado Creek, NASA Crows Landing Flight Facility

Transmitted for your review is the plan for construction support for activities planned at Little Salado Creek, adjacent to the former Naval Auxiliary Landing Field (NALF), Crows Landing (now known as NASA Crows Landing Flight Facility). We are planning to provide support during the San Luis and Delta-Mendota Water Authority (SLDMWA) channel maintenance activities along a reach of the Little Salado Creek channel from Davis Road to Ike Crow Road. The attached documentation describes the planned procedures.

We do not believe that an Explosive Safety Submission (ESS) is required due to the low probability of encountering unexploded ordnance in the Little Salado Creek channel, and we have attached the request for waiver of the ESS.

We would be available to participate in a conference call during your review of the attached documentation. We would appreciate your review comments by 17 May 2004, if possible.

Please do not hesitate to contact me at (619) 532-0783 if you have questions pertaining to this transmittal.

Thank you very much.
