SUMMARY REPORT FOR STABLE AREA AERIAL PHOTOGRAPH ANOMALIES, MARINE CORPS AIR STATION (MCAS) EI TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) has reviewed the above report dated June 14, 1999. We also reviewed the Addendum inspection checklist dated July 20, 1999 in response to DTSC comments dated July 13, 1999. The Report presents the results of the record search activities and visual inspections of the stable area. The area comprises approximately 50 acres and is located in the northeastern section of MCAS El Toro. The report divided the stable area into the following five (5) aerial photograph anomalies (APHO): APHO13 also known as Science Application International Corporation (SAIC) 102, APHO 14 (SAIC 105), APHO 45 (SAIC 289), APHO 47 (SAIC 427), APHO 48 (SAIC 431), plus fourteen other anomalies located in the vicinity of the stable area.

The report recommends a no further action status for all nineteen (19) anomaly sites based on evaluation of historical aerial photographs, Station maps and plans, Station property records, environmental program management plans, the results of previous environmental restoration program investigations, and visual site inspections conducted in June and July 1999.

DTSC concurs with the proposed no further action status designation for the Stable Area Anomalies. The no further action status can be documented in the next BRAC Cleanup Plan updated. If you have any questions, please contact me at (714) 484-5418.

Sincerely,

Tayseer Mahmoud
