PROPOSED WELL CONSTRUCTION PROCEDURES FOR REPLACEMENT MONITORING WELLS, MARINE CORPS AIR STATION (MCAS) EL TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) reviewed the above transmittal dated June 12, 2000. The document identifies the proposed well construction procedures for four wells identified in a transmittal dated April 24, 2000 and ten wells identified in a transmittal dated May 19, 2000. Additionally, the above transmittal proposes to install a new groundwater monitoring well to replace existing well 18_BGMW18A that has a submerged screen.

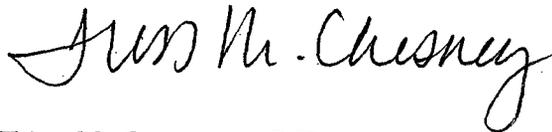

The replacement wells (total of 15 wells) will be constructed using the well drilling, installation, and development procedures identified in Section 3 of the *Draft Final Groundwater Remediation Pilot Test Work Plan, Marine Corps Air Station, El Toro, California* (Bechtel National, Inc., July 1997).

After review of the June 2000 transmittal, DTSC is satisfied that comments forwarded in our June 2, 2000 letter have been adequately addressed. As a result, DTSC agrees with the construction of 15 replacement groundwater wells identified

Mr. Dean Gould
