In accordance with Cleanup and Abatement Order No. 87-97, enclosed is the MCAS El Toro Interim Groundwater Treatment System Monthly Report for the month of April 1990. The interim groundwater treatment system has been shut down since late April due to damages of the pump discharge piping. The piping repair was completed 26 June. The next monthly monitoring and sampling should be conducted at the end of July.

This report contains a summary of activities associated with the treatment system, a discussion of results, and all analytical data.
