## Site 3 and 5 Former Marine Corps Air Station Proposed in-Waste Landfill Gas Investigation– El Toro, California

Dear Mr. Piszkin:

The California Integrated Waste Management Board (CIWMB) staff has reviewed your proposal for the investigation of landfill gas from the landfill sites 3 and 5 at El Toro. The proposal includes collection of landfill gas samples utilizing direct push probes inside the waste at 30 and 11 locations within landfill sites 3 and 5 respectively in order to determine the concentration of landfill gas as methane within the waste fill mass. We approve your workplan for this investigation as long as landfill gas sample collection are performed using Quality Assurance guidance provided in the California Department of Toxic Substances Control's (DTSC) Advisory for Active Soil Gas Investigation dated January 13, 2003.

We appreciate the opportunity to review your proposal and look forward to assisting you with this project. Please call Gino Yekta of my staff at (916) 341-6354 or me at (916) 341-6318 if you have any questions.

Sincerely;

Michael B. Wochnick, P.E., Supervisor  
Remediation, Closure and Technical Services
