Subj: Hazardous Waste Temporary Accumulation Area (TAA) 77
Marine Corps Air Station, El Toro

Ref: Closure Report (OHM, December 1998)

The purpose of this fax is to provide clarification concerning the number of samples collected at TAA 77 at the Marine Corps Air Station, El Toro.

Two samples (depths of 18 inches and 36 inches) were collected from each of six (6) soil borings at TAA 77 for a total of twelve (12) samples as shown in Table 3-2 of the report.

The text in Section 2.2, page 2.1 indicates that twelve (12) samples were collected from TAA 77.

The text in Section 3.1, page 3-1 indicates that twelve (12) samples were collected from TAA 77.

The text in Section 5, page 5-1 of the Closure Report incorrectly states that ten (10) samples were collected from TAA 77. Please consider that the text in Section 5, page 5-1 is in error and that the correct number of samples is twelve (12) rather than ten (10). My apologies for the inconsistency in the text of the report.

Thank you very much.
