U.S. Environmental Protection Agency
Attn: J. Smith
215 Fremont Street
San Francisco, CA 94105

Gentlemen:

Enclosed is the work plan describing the proposed actions to remove and dispose of PCB contaminated soils discovered near building 503 at Hunters Point Naval Shipyard. This work plan was requested during the meeting with representatives of the Department of Health Services, the San Francisco Bay Regional Water Quality Control Board, and the U.S. Navy held on December 8, 1986 to discuss remedial actions for this site. We plan to implement this work plan the first week of January 1987 and will need your review comments by December 31, 1986.

If you have any questions, please call Mr. Gregory Brown of this Command at (415) 877-7495. Thank you for your interest and cooperation.

Sincerely,

Original signed by:

Alex E. Dong
Head, West Central Environmental Section
