17 FEB 1988

Mr. R. James
State of California
California Regional Water Quality
Control Board
San Francisco Bay Region
1111 Jackson Street, Room 6340
Oakland, CA 94607

Dear Mr. James:

Enclosure (1) is our final report summarizing our evaluation of the structural characteristics of the pickling and plate yard emergency containment structure at Naval Station Treasure Island, Hunters Point Annex, San Francisco. The draft report was submitted to you on December 17, 1987. Ms. L. Tang of your staff indicated during a phone conversation on January 26, 1988 with Mr. G. Brown of my staff that there were no comments on the draft report. She requested that we submit a final report, which is enclosed. To summarize the findings of the report, it was concluded that the containment structure would maintain its integrity while free-standing under the emergency conditions for which it was designed and therefore would be exempt from Toxic Pit Cleanup Act criteria.

Should you have any questions, the point of contact is Commander, Western Division, Naval Facilities Engineering Command (Attn: Mr. Alex E. Dong, Code 1146, (415) 377-7502).

Sincerely,

W. F. HARRIS
CAPTAIN, CEC, USN
ACTING COMMANDER
