Subj: UNDERGROUND STORAGE TANK INVESTIGATION AT NAVAL STATION, TREASURE
ISLAND, HUNTERS POINT ANNEX

Enclosure (1) is our draft work plan for assessing underground storage tanks at Naval Station, Treasure Island, Hunters Point Annex (HPA). The work plan addresses known underground tanks that were previously used by the Navy or Triple A Machine Shop, Inc. None of the underground tanks at HPA are currently in use. The purpose of the study is to identify those tanks that may have leaked and to characterize the extent of contamination from leaking tanks. The enclosed work plan includes both the Quality Assurance/Quality Control Plan and the Health and Safety Plan for the study. The Navy is also investigating HPA for additional abandoned tanks that have not been identified to date. Any tanks found will undergo similar assessments as those outlined in enclosure (1).

We would like to begin our field work as soon as we receive your comments. Please provide any comments within 30 days of receipt of this work plan. Comments should be forwarded to Commander, Western Division, Naval Facilities Engineering Command (Attn: Mr. Alex E. Dong, Code 1146, (415) 877-7502).

Sincerely,

W. F. HARRIS
CAPTAIN, CEC, USN
ACTING COMMANDER
