Commanding Officer  
Naval Station Treasure Island  
Bldg. 1 (Code 70)  
San Francisco, CA 94130-5000

(Attn: Mr. Kam Tung)

Gentlemen:

The District has reviewed the Preliminary Public Health and Environmental Evaluation (PHEE) Plan for the RI/FS, Hunters Point Annex. The District feels that the plan is well organized and thorough. However, there are several points that Pat Holmes, Toxicologist for the District, feels need addressing. Her comments are:

Page 3-7 There is a statement that on-site concentrations and background concentration will be compared. What will the criteria for background be? This should be established beforehand.

Page 3-10 There is a statement that specific criteria for classifying toxic chemicals developed by Clements will be used in this assessment. There is the additional statement that Clements' methodology "is acceptable in the industry". A copy of this methodology should be submitted to the Toxic Evaluation Section of the District so that its acceptability (or lack thereof) for BAAQMD purposes can be ascertained.

Page 3-13,14 There are several references to choosing models for assessment of exposure pathways and receptors. I suggest that the Navy confer with one of the modelers in our planning department as to the suitability of the selected models before any extensive calculations are run.

If you have any technical questions concerning air toxics, please call Pat Holmes, Toxicologist, Toxics Engineering Section at (415) 771-6000, extension 226 or Steve Hill, Manager, Toxics Engineering Section at (415) 771-6000, extension 233. If you have any technical questions concerning dispersion modeling, please call Tom Perardi, Director, Planning Division at (415) 771-6000, extension 243. If you have any further questions, please call Permit Services at (415) 771-6000, extension 212.

Very truly yours,

Scott Lutz  
Air Quality Engineer  
Permit Services Division

B/N 2
