Building I (Code 84)
San Francisco, CA 94130

Dear Mr. Sarmiento:

Enclosed are EPA's comments on the Revised Tidal Influence Monitoring Plan and the Well Survey for Hunters Point Annex. Our comments refer to Appendix A: Navy Response to Comments on TIMP.

If you have any questions, please call me at (415) 744-2388.

Sincerely,

A handwritten signature in cursive script that reads "Chuck Flippo".

COMMENTS ON REVISED TIDAL INFLUENCE MONITORING PLAN FOR
HUNTERS POINT

COMMENT NO.

Attachment 1 - EPA Review of HPA "Results of Well Survey"

4. It is not clear where the "appropriate response" is included in the TIMP. There appears to be no reference for conductivity of fresh water. Section 4.2.3 Laboratory Analysis of Ground-Water Samples makes no reference to other contaminants which will affect conductivity. Section 6.1 makes reference to "available water quality data" in Table 1, but the Table 1 within the TIMP presents tide data and the Table 1 included in Appendix B with the Results of Well Survey includes only conductivity data. There does not appear to be any reference to water quality collected by the Remedial Investigation activities.

Attachment 2 - EPA Review of Plan for Pilot Tidal Influence Study

1. Available water quality data for wells is not provided in the TIMP.
7. In the process of incorporating OU-V into the TIMP, a necessary change was omitted on Page 1: Paragraph 4, second sentence should state that the TIMP primarily addresses just one of five groups of IR sites.
