Subj: SITE INSPECTION FIELD WORK FOR PARCEL-A AT THE NAVAL STATION,
TREASURE ISLAND, HUNTERS POINT ANNEX (HPA), SAN FRANCISCO, CA.

1. As part of the approved Site Inspection (SI) workplan and workplan addenda for Parcel-A, and to expedite the SI activities, the Navy performed investigation by excavation at the sites for PA-19, PA-41 and PA-43. These excavations must be backfilled, and the Navy has proposed to use for this purpose the material that is described in enclosure (1).

2. Mr. William Radzevich, the Western Division Remedial Project Manager (RPM) for Parcel-A, has previously forwarded enclosure (1) by facsimile transmission to the offices of the U.S. Environmental Protection Agency, the California Department of Toxic Substances Control and the California Regional Water Quality Control Board, and has discussed this backfill material with the HPA RPMs from these agencies. It is his understanding that the agency representatives agree with the use of this material for backfilling purposes at the sites for PA-19, PA-41 and PA-43 in Parcel-A at HPA.

3. If there are any additional questions regarding this matter, please notify Commander, Western Division, Naval Facilities Engineering Command (Attn: William Radzevich, Code T4E1WR (415) 244-2555).
