**Community Notification
Drilling and Soil Sampling
IR-52 Offsite Railroad Right-of-Way
Hunters Point Annex
San Francisco, California**

Dear Mr. Brooks:

This letter is to inform you and the Hunters Point community of the drilling and soil sampling program scheduled for the Hunters Point Annex (HPA) Naval shipyard offsite railroad right-of-way (IR-52) as part of the facility environmental cleanup. The area proposed for drilling is along the railroad tracks as they exit the west side of HPA between Palou Avenue and Bancroft Avenue.

The drilling will occur from August 15, 1994 to August 31, 1994, between 8 a.m. and 5 p.m., Monday through Friday. The Navy intends to drill ten soil borings, one per city block, to approximately 20 feet below ground surface at locations illustrated on the attached plate. Soil samples collected from each boring will be analyzed for industrial solvents, creosote (railroad tie preservative), pesticides, PCBs, metals, and petroleum hydrocarbons (gasoline, diesel, and motor oil and their constituents).

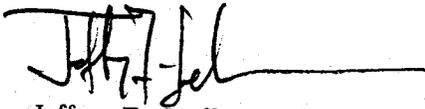

Each drilling location will be delineated with barricades, cones, and caution tape to minimize public access to the drill site. No hazards to the public are expected to result from the drilling and soil sampling at these locations.
