Subject: Summary of Hunters Point Annex Parcel A Sandblast Investigation Meeting Held on December 14, 1994, at Engineering Field Activity West, San Bruno, CA

Dear Mr. Radzevich,

This letter is a summary of the meeting at Engineering Field Activity West (EFA WEST) on December 14, 1994, with the Navy, U.S. Environmental Protection Agency (EPA), Department of Toxic Substances Control (DTSC), PRC Environmental Management, Inc. (PRC), and Harding Lawson Associates. The meeting was held to discuss the Navy's progress and analytical results of the sandblast field investigation for pesticides in soil in the open lot on Jerrold Avenue at Hunters Point Annex (HPA) Parcel A. The meeting opened at 9:30 a.m. and concluded at 12:15 p.m. The list of the attendees is attached. Items discussed and action items are as follows:

Discussion Items

The discussion covered the field work that has been completed, comparison of field test kit data with laboratory data, future work, and the report of the investigation (placement and scope). The following specific items were discussed.

1. The limited extent of the sandblast material was discussed at length.
2. DDT detected in one surface sample and not detected at depth, north of the lot was discussed at length. EPA will discuss this internally.
3. The Navy requested specific applicable or relevant and appropriate requirements (ARARs) for the Parcel A reports, from the agencies.
4. Including the sandblast investigation as an addendum in the site inspection (SI) report or the remedial investigation (RI) report was discussed.
5. The schedule for the transfer of Parcel A to the city of San Francisco was discussed.

Action Items

1. The EPA will provide the Navy with a reference identifying raptor egg shell thinning at a DDT concentration of 0.1 parts per million.
2. The laboratory data will be validated and the data tables will be updated by December 30, 1994 by the Navy.

Mr. Radzevich

Page 2

3. The EPA will conduct a quality control review of the laboratory data. After concurrence with the data validation results, the EPA and DTSC will contact the Navy regarding backfilling of the areas of the lot that have been excavated for the sandblast investigation by January 13, 1995.
4. The Navy and the regulatory agencies agreed to discuss the scope of the Parcel A RI report tentatively on January 11, 1995.
5. The Navy and the regulatory agencies agreed to discuss ARARs for Parcel A tentatively on January 24, 1995. The EPA will supply federal ARARs and DTSC will contact appropriate state agencies, but will not compile or supply specific ARARs not regulated by DTSC. The Navy will provide DTSC with a site description, list of chemicals of concern, and proposed remedy for each site in Parcel A.

Sincerely,

Scott Weber
Assistant Project Manager
