Subject: Proposal to dispose of investigative derived waste from IR-07 and IR-18, Hunters Point Annex.

DTSC requested that DHS agree to the disposal of waste as described in a March 7, 1996 letter from the U.S. Navy (5090 Ser 1832.3/L6135). Based on this letter and the information and data contained in the August 30, 1994 U.S. Environmental Protection Agency (EPA) petrographic analysis of soils report referenced in the Navy's letter, DHS agrees that the levels of radioactivity are below the presently accepted 5 pCi/g for soil and can therefore be disposed as the Navy decides.

This review was performed in support of the Interagency Agreement between DHS and DTSC. If you need additional information, please contact me at (916) 324-2209.
