Subj: TECHNICAL MEMORANDUM, REVIEW OF PCB OCCURRENCES IN SOIL AND  
GROUNDWATER, HUNTERS POINT SHIPYARD, SAN FRANCISCO,  
CALIFORNIA  
Encl: (1) Technical Memorandum, Review of PCB Occurrences in Soil and Groundwater,  
Hunters Point Shipyard, dated 31 May 1996

1. In connection with the Navy's Base Closure Program, PCB occurrences in soil and groundwater have been evaluated regarding adequacy of characterization for risk assessment and feasibility study purposes. At a majority of the sample locations, the characterization was considered adequate. Areas with possible needs of further characterizations occur in soils in Parcel D and in the groundwater in Parcel C and Parcel E.

2. Those areas with possible need for further characterization mentioned within this report have been integrated into the ongoing sampling activities of the remedial investigations(RI). This current sampling will be reported in the parcel-wide RI reports. Enclosure(1), which documents the results of this study, is forwarded for your reference.

3. If you have any questions regarding this letter, please contact the undersigned at (415) 244-2655.
