**Subject:** RE: Daily Reports

Laurie,

The Parcel B Design Plan includes a discussion of the "Outfall Removal and Replacement" in Section 3.8.4. TtEC will remove six existing outfalls and replace three of them to convey the re-designed stormwater surface drain system to the Bay. ITSI is a team subcontractor to TtEC under RAC IV. We have been discussing the re-design of the outfall with ITSI to explore the possibility of getting them involved in that aspect of the work. If we decide to work with ITSI on the outfall re-design, all work will be under the TtEC supervision with all radiological work conducted by TtEC and NWT team. ITSI's work (if a subcontract is granted) will be focussed on the re-design and re-construction of the outfalls. The meeting was held to discuss the possibility of this collaboration between TtEC and ITSI. Please let me know if you have any questions or concerns.

Sincerely,

Jamshid Sadeghipour, PhD, PE

Subject RE: Daily Reports

Daryl/Jamshid: I noted that the daily report for 11 May stated that TTECI was meeting with ITSI about the outfall removal and replacement. Is this going to be done under a separate work plan? The shoreline and Parcel F are radiologically impacted areas and I don't remember this being addressed in the base-wide sewer/storm drain work plan. What is the schedule for this work and when will the document be provided for review? LLL
