Commander Long Beach Naval Station  
Long Beach Naval Station  
Long Beach, California 90822-5000

Dear Captains Janov and Jones:

**TECHNICAL MEMORANDUM NO. 4 - FINAL IMPLEMENTATION OF FINAL RI/FS  
SAMPLING AND ANALYSIS PLAN FOR NAVAL STATION LONG BEACH, LONG BEACH,  
CALIFORNIA**

The California Department of Toxic Substances Control (Department) has completed its review of the Technical Memorandum No. 4 - Final Implementation of Final RI/FS Sampling and Analysis Plan (Technical Memorandum No. 4) dated June 9, 1994, for Long Beach Naval Station, Long Beach. The Technical Memorandum No. 4 for Site 7 was prepared for SouthWest Division Naval Facilities Engineering Command by Bechtel National, Inc.

The Department's position regarding the Technical Memorandum No. 4 was that the sampling design was not optimal and suggested modifications. Based on the Regional Water Quality Control Board's experience with the Bay Protection and Toxic Cleanup Program, at the June 9, 1994, meeting, the Department felt that the new information presented would have significantly improved the design. However, the Navy wants to proceed with the initial design despite the possibility of being required to perform additional sampling at a future date. As a result, the Department is hereby approving Technical Memorandum No. 4 dated June 9, 1994. As a suggestion, the Department would like to have a meeting to discuss data interpretation and to assure that all the agencies concerns are addressed.

If you have any questions regarding this letter please contact Mr. Alvaro Gutierrez at (310) 590-5565.

Sincerely,

A handwritten signature in cursive script that reads "Albert A. Arellano, Jr." followed by a stylized flourish.

Albert A. Arellano, Jr., P.E., Chief  
Region 4 Base Closure Unit  
Office of Military Facilities
