SUBJECT: LONG BEACH NAVAL COMPLEX SITE 6A - JUNE 18, 1993 MEETING MINUTES

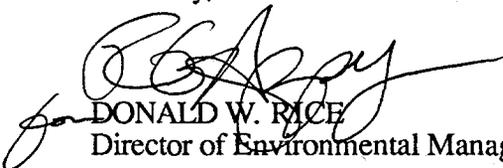

To Whom it Concerns:

On June 18, 1993, a meeting was held to discuss various issues regarding Site 6A of the Long Beach Naval Complex and proposed actions to be taken on the site. A brief description of the proposed Port of Los Angeles Pier 300 Project of the was given including a description of the proposed improvements which impact Site 6A.

Enclosed are minutes from the meeting to help clarify the various issues which were discussed and a sign in sheet of the attendees of the meeting.

If you have any comments or additional discussion items to be included in these minutes, please contact Betsy Mitchell at (310) 732-3975.

Sincerely,

DONALD W. RICE
Director of Environmental Management

**LONG BEACH NAVAL COMPLEX
SITE 6 A**

June 18, 1993 Meeting Minutes

A meeting was held on June 18, 1993, to discuss the Long Beach Naval Complex Site 6A with regards to the remedial process being performed on the site as part of the closure of the naval facility and the Port of Los Angeles (Port) Pier 300 project improvements which impact this site.

A brief description of the Pier 300 project was given. This description included a discussion of the temporary detour roadway and improvements, and the long term improvement on the site for the Pier 300 rail tracks.

The geotechnical aspects of the design for the temporary roadway were discussed due to the nonhomogeneous nature of the Site 6A. A more detailed geotechnical survey will need to be completed prior to construction of the roadway and the rail tracks.

A brief discussion of the Phase I site investigation was given. The investigation included 27 soil borings to the depth of 5, 10, and 15 feet. No surface soil samples were taken. As part of the Phase II investigation on the site, surface soil samples will be analyzed.

Tentative schedules for both the Pier 300 project and the Navy remedial process were given. The proposed Pier 300 schedule is attached. The schedule for the remedial process needs to be defined by Bechtel which will be given at the next meeting on July 19, 1993. Tentatively the following schedule was discussed for the remedial process:

- | | |
|---|--------------------------------|
| • Award Contract to Bechtel | July 12, 1993 |
| • SAP, Review periods, and Fieldwork | July 12 to December 1, 1993 |
| • Draft RPT, Navy and DTSC review | December 1 to January 15, 1994 |
| • CEQA Document | December 1 to April 1, 1994 |
| • Prepare & Award Removal Action Contract | January 15 to March 31, 1994 |
| • Removal Action | April 1 to June 30, 1994 |

The issue of CEQA compliance was discussed. The Pier 300 project has been discussed in the Ports EIR for the entire Pier 300 project. The Removal Action will most likely require a CEQA assessment. The DTSC will be the Lead Agency for either the Negative Declaration or the Exemption. This still needs to be determined. The tentative schedule for a CEQA document to be available for public review is December 1, 1993.
