RE: Site Management Plan Comments

REMARKS:

These are my comments on the Site Management Plan for Site 11 Time Critical Removal Action:

3.5 Health and Safety Coordination

The contractor will need to coordinate with the SY's Health and Safety personnel.

3.9 Equipment Decontamination

In regards to the "temporary storage tank" for the decon rinsate, Spill Prevention Control & Countermeasure Program Manager (Joe Marano) should be consulted to determine if the proposed method of handling and storing the rinsate ~~is~~ conforms to the Shipyard's SPCC plan.

4.1 Construction Sequence

The Program Manager (Rob Robinson) for NPDES should be consulted to determine if the water from the Toe Drain can be discharged to the stormwater drainage system.

6.2.1 Water (Also, Table 6.1)

If water is to be discharged to the sewer system, the Program Manager (Hoa Ninh) must be consulted to determine the criteria for sewerability of the water.

When it's time, I can help with the coordination between IT and the various Program Managers.

If you have any questions, please call me.

Anna
