Commanding Officer
Department of the Navy
Naval Air Station
Moffett Field, California 94035

Dear sir:

Subject: Sealing of Moffett Field Wells #062W14M01 and #062W14M02

There has been some discussion about the Santa Clara Valley Water District sealing the above wells under its well sealing program. I regret that District policy will not permit expending funds to seal wells that are subject to a sealing order issued by the Regional Water Quality Control Board or another agency.

The District is, however, interested in insuring that any potential threat to the groundwater basin is abated in a expeditious manner. We are prepared to cooperate and seal these wells if the Navy will agree to reimburse the District for all costs associated with the well sealing.

The Navy will also be responsible for the analysis, handling, and disposal of any hazardous effluent produced by the well sealing process.

If the above conditions are acceptable, and time can be saved by the District's participation in the the project, we will be happy to assist.

Sincerely,

John H. Sutcliffe
Division Engineer
Technical Services Division
