Subj: SCHEDULE FOR REMEDIAL INVESTIGATION AT NAS MOFFETT FIELD

Dear Ms. Tang:

As requested by your phone call of December 7, 1988, enclosure (1) is our schedule for Phases I and II of the Remedial Investigation (RI) at Naval Air Station (NAS), Moffett Field. As shown in enclosure (1), field work for Phase I has been completed. We have forwarded, under separate correspondence, the first quarterly report for field work completed as of November 1, 1988. The second quarterly report, due in March 1989, will provide the remaining results of the Phase I soil sampling and the first round of groundwater sampling. We will provide the results and discuss any modifications to the sampling plan with the regulatory agencies prior to implementing Phase II field work at Sites 3 through 9. Based on this schedule, we expect to submit the RI Report for Phases I and II by April 1990, and a proposal for a Phase III investigation, if required, by September 1990.

Should you have any questions regarding this matter, the point of contact is Commander, Western Division, Naval Facilities Engineering Command (Attn: Mr. Richard Seraydarian, Code 1811RS, (415) 877-7505).

Sincerely,

Original signed by:

Louise T. Lew
Head, NPL Section

All	----	----	----	----	----	----	----	----	----	10/89-2/90	3/90-5/90

a: Includes geophysical borings, "clearing" well locations, and surveying.

b: Includes 6 rounds of sampling (1 year), aquifer tests, and water level monitoring.

c: Requires evaluation of two months of ground water data and soil gas survey data. Includes analytical turnaround.

d: Requires evaluation of minimum of two months of Phase II ground water data; includes analytical turnaround. Critical date is initiation of Phase II ground water sampling in 8/89 at Site 4. Balance of Phase II ground water monitoring data would be provided in following quarterly reports.
