Environmental, Safety & Health, O/KE-10, B57  
111 Lockheed Martin Way  
Sunnyvale, CA 94088-3504

Dear Mr. Lund:

Thank you for meeting with the United States Department of the Navy (Navy) on August 5, 2003 to discuss future plans for Site 27 – Northern Channel (the site) at the former Naval Air Station Moffett Field in Santa Clara County, California. The Navy appreciates the ability of the LMSSC attendees to re-arrange their schedules to attend this meeting on such short notice.

As agreed during our meeting, Lockheed Martin Space Systems Company (LMSSC) will provide the Navy written comments, concurrence or a request for additional time to review the Draft Final Feasibility Study for the Northern Channel before August 14, 2003.

Also as discussed at the meeting, the Navy requests access to LMSSC property to complete the data gaps sampling for the site as identified in the Northern Channel Data Gaps Investigation Field Work Plan of January 21, 2002. During that investigation the Navy did not collect soil samples from the southern berm of the Northern Channel, east of the fuel pier bridge, or sediment samples from the Lockheed channel. The purpose of these samples is to define the extent of contamination at the site prior to completion of the remedial design. The Navy would like to secure access to the LMSSC property by 30 September 2003.

If questions or concerns arise, please do not hesitate to contact me at (619) 532-0911 or Mr. Scott Gromko at (619) 532.0933, if questions or concerns arise.

Sincerely,

A handwritten signature in black ink, appearing to read "Keith S. Forman", written over a horizontal line.

KEITH S. FORMAN  
BRAC Environmental Coordinator  
By direction of the Commander
