Public Comment Period for the Hanger 1 Administrative Record File (Former Naval Air Station Moffett Field) November 14 to December 15, 2003

The U.S. Department of the Navy invites the public to review the Administrative Record File for the NAS Moffett Field Hanger 1 project. The Administrative Record File contains the Action Memorandum and other documents related to the Navy's interim cleanup action at Hangar 1.

Hangar 1 was identified as a source of PCBs by the National Aeronautics and Space Administration's Ames Research Center (NASA) when PCBs were found in sediment surrounding NASA's storm water settling basin (located in the Eastern Diked Marsh). It was determined that PCBs from Hangar 1 were passing through the storm drain system and into the Eastern Diked Marsh. The Navy, with concurrence from NASA and regulatory agencies, determined an interim cleanup action would be taken to protect human health and the environment until a final remedy can be determined. The interim cleanup action is designed to:

1. stabilize PCB-containing materials on the exterior of Hangar 1 through the application of an exterior coating; and
2. limit public access to Hangar 1 through installation of a fence around the site and limiting worker access.

The public can review the Administrative Record File for Hangar 1 at the Mountain View Public Library, 585 Franklin Street, Mountain View, CA 94041; (650) 903-6877. Comments on the Administrative Record should be directed to: Ms. Andrea Espinoza, BRAC Environmental Coordinator, Southwest Division Naval Facilities Engineering Command, 1230 Columbia Street, Suite 1100, San Diego, CA 92101, or via e-mail to: andrea.espinoza@navy.mil or by phone at: (619) 532-0911. Comments provided to the Navy during this time period will be responded to and included in the Hangar 1 (interim cleanup action) Construction Completion Report that will be published in early 2004.

PERKINS ON REAL ESTATE

Online banking helps the prevention of identity theft

By BRODERICK PERKINS

A consumer stands a greater chance of getting hit by lightning than becoming a victim of fraud or identity theft when they use electronic bill payment and account services, according to a new study.

Dispelling technophobic myths that the Internet is an open door for thieves, the study reveals just the opposite—the Internet can actually help protect consumers and businesses from two of the most common kinds of identity theft: fraudulent opening of new accounts and unauthorized use of existing accounts.

Online banking benefits come from both monitoring personal accounts and paying bills electronically.

"Turning off the paper" can help prevent more than 1 million cases of identity theft and save consumers and businesses \$4.8 billion each year, according to "Online Banking and Bill Paying: New Protection from Identity Theft." The study was recently released by Javelin Strategy and Research, a Pleasanton-based consultant for financial services, payments, and commerce sector companies.

That prevention and cost savings

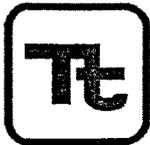

being sent to mailboxes than ever before, with the average household receiving 20 paper statements and bills per month," said Van Dyke.

"By receiving and paying bills online, consumers take the information out of their mailbox and out of the reach of those who would fraudulently open an account or make unauthorized purchases on existing accounts. Businesses that encourage their customers to move to electronic billing and ask them to turn off paper bills are also helping to reduce the costs of fraud," he added.

Van Dyke also said the cost of identity fraud mounts when there's more time to commit the crime. Online banking tends to reduce that time.

Paper-based customers typically see their accounts once a month and, because of the nature of billing cycles, monthly statements can include activity that's more than a month old. Online-banking consumers, on the other hand, typically view their accounts four times as often as paper-based customers.

Online customers are more apt to view their account even more often if it is set up with triggers that automatically email
