Contract Task Order No. 0024

Re: Soil Piles Field Sampling Plan

Dear Mr. Chao:

PRC is pleased to submit three copies of the Soil Piles Characterization Field Work Plan (FWP) for NAS Moffett Field. Copies of the FWP and my letter to you dated February 14, 1991 have been forwarded to the EPA, RWQCB, and DHS.

In addition to the sampling activities described in the FWP, PRC will sample soils from the military construction area located behind the NAS Moffett Field Public Works Division (PWD) offices. All procedures described in the FWP will be followed. The number of samples and tests to be performed on these samples are as follows:

<u>Sample Location</u>	<u>Number</u>	<u>Test Methods</u>
Composite samples from excavation side walls	4	VOCs, TPH (gas and diesel), total oil and grease
Composite Samples from excavation soil pile	3 to 6	TPH (gas and diesel) total oil and grease

Mr. Doug Bonham from PWD will be contacted to coordinate access to the area and to confirm sample locations. Please call me at 415\543-4880 if you have any questions.

Sincerely,

Thomas P. Adkisson  
Project Manager
