## Unfortunately, this is how most people feel about colon cancer screening.

Contrary to popular belief, you'll find there's nothing horrible about colon cancer screenings. Colon cancer is curable. In fact, with early detection 90% of colon cancer patients will survive more than five years.

But due to fear, embarrassment, or lack of information, only 37% of all cases are detected early. With exercise, a well-balanced diet and regular check-ups, you can fight the nation's number two cancer killer.

Strides for Life, a local organization dedicated to colon cancer prevention, and Sequoia Hospital encourage you to call 650-482-6000. We'll help you find a doctor who can help determine which colon cancer screening option is right for you. Because the key to surviving colon cancer is not hiding from it.
