Contract Task Order Number 0134

RE: Naval Air Station Moffett Field  
Site 9 Field Investigation Technical Memorandum

Dear Stephen:

Enclosed are three copies of the final Site 9 Field Investigation Technical Memorandum. Additional copies are being forwarded to the regulatory agencies. The components of the technical memorandum include a description of field investigation activities conducted at Site 9 during July 1991, a presentation of the analytical results from these activities, an updated characterization of the hydrogeology and the nature and extent of contamination at Site 9, and a discussion of the effects of the updated site characterization on potential source control actions at Site 9. The technical memorandum is presented as two volumes: report narrative and data appendices. In addition, a point-by-point response to regulatory agency comments on the draft technical memorandum is included.

If you have any questions, please call me at 303/295-1101.

Sincerely,

PRC Environmental Management, Inc.

Joshua D. Marvil  
Project Manager
