Re: Draft Final OU6 Baseline Human Health Risk Assessment Workplan, dated October 1, 1993

Dear Mr. Chao,

The U.S. Environmental Protection Agency (EPA) has received and reviewed the subject document and its associated response to comments. It is obvious that many changes have occurred since the draft version of this document was released. In general, the changes are positive and the document will better serve its purpose as a workplan for a human health risk assessment. But since so many changes have been made, it is not surprising that a few questions have arisen. Until these items are resolved, EPA cannot approve this document as a final. According to the Federal Facilities Agreement (FFA) §9.9 (Finalization of Reports), the draft final primary document shall serve as the final document if no party invokes dispute resolution regarding the document. As always, EPA would like to resolve these issues outside of the formal dispute resolution process. EPA's comments follow. Please call me at 415-744-2383 if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Michael D. Gill".
