Subject: NAS Moffett Field Remedial Investigation/Feasibility Study  
Draft Phase I Site-Wide Ecological Assessment Report

Dear Camille and Stephen:

Please find enclosed three copies of the subject document. This document is in partial fulfillment of Contract No. N62474-88-D-5086, Contract Task Order 0236. It would probably be useful for you to peruse the executive summary prior to a review of the rest of the document. Also keep in mind that it was agreed that the Phase I and II work plans and reports would contain the elements shown in Attachment A in order to facilitate agency input interactively throughout the development of the assessment. Note that the Phase I report is intended to be a qualitative evaluation of the data collected and focuses on an evaluation of the presence or absence of chemicals of potential concern, potential receptors, and potential pathways. The quantitative evaluation will be made in the Phase II work plan after agency input. Please call if you have any questions.

Sincerely,

*Ruth Seigmund for*
