Re: Raychem Field Trial Of Electron Injection Technology Workplan

Dear Steve,

The U.S. Environmental Protection Agency (EPA) has received the following document describing the groundwater remediation pilot study that will occur on Moffett Field this summer. The workplan is sufficient to proceed with the study. The Navy (or Raychem) should provide regular status to the regulatory agencies once the pilot study has started. We appreciate the effort that went into the conference calls and meetings leading up to this report. If you have any questions, please call me at 415-744-2383.

Sincerely,

A handwritten signature in black ink that reads "Michael D. Gill".
