Mr. Stephen G. Chao, P.E.
BRAC Environmental Coordinator
Department of the Navy
Engineering Field Activity, West
Naval Facilities Engineering Command
900 Commodore Drive
San Bruno, CA 94066-5006

Dear Mr. Chao:

In response to your letter dated April 14, 1995, requesting an Experimental Exemption pursuant to Regulation 1-111, your request is hereby denied. The soil vapor extraction test you describe does not qualify for an experimental exemption because its purpose does not arise "from the investigation, experiment or research to advance the state of knowledge or improve technique in air pollution abatement," as required by Regulation 1-111.1.

Ms. Cindy Winslow of my staff has discussed this matter with Mr. Willis Wilcoxon, as your letter requested. Mr. Wilcoxon was advised to contact Mr. Hon Ting Man, Permit Engineer, at (415) 749-4712 to pursue other more appropriate avenues for addressing your needs.

Sincerely,

A handwritten signature in black ink, appearing to read "Milton Feldstein".

Milton Feldstein
Air Pollution Control Officer
