Reply to Attn of:

Mr. Stephen Chao
Department of the Navy
Engineering Field Activity West
900 Commodore Way, Building 101
San Bruno, California 94066-0720

Dear Mr. Chao:

This letter contains NASA's comments on the *Draft Wash Rack Area Investigation FieldWork Plan* dated April 21, 1995 as described below.

1. Page 5, Section 3.3, 1st para. and Figure 3

The location (symbol) of manhole 7.6 is not shown on Figure 3.

2. Page 11, Section 4.3.1, 2nd para. and Figure 3

Only monitoring well numbers (WWR-x) are shown on Figure 3. But text indicates that the locations of soil borings (SBWR-x) can be found on Figure 3. For clarity in the text perhaps indicate that WWR-x is the same as SBWR-x.

3. Page 11, Section 4.3.1, 4th para.

Which investigation will be installing a soil boring near former Tank 41A?

4. Page 14, Section 4.4, 1st para.

The well head box should also include the well number.

5. Page 15, Section 4.6 and Figure 3

The location of benchmark H-111 should be indicated on Figure 3.

6. Page 15, bottom of page

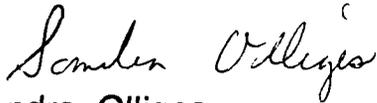

Delete duplicate title heading "5.0 Quality Assurance Project Plan" which also occurs on the top of page 17.

225A

7. Are any soil samples going to be taken from the cone penetrometer tests/hydropunch (CPT/HPWR) locations 8, 9, 10, 11, or 15?

Thank you for the opportunity to comment on these draft plans. If you have any questions or comments, I can be reached at (415) 604-3355.

Sincerely,

Sandra Olliges
Environmental Program Manager
