**Subj: Relocation of the 36" High Pressure Gas Transmission Line at the Site 2 Landfill  
for Construction of a Multilayer Cap, Moffett Federal Airfield, Mountain View,  
California**

Dear Mr. Manegold:

This letter is written to discuss the 36" high pressure gas transmission line owned and installed by Pacific Gas & Electric (PG&E) that runs through the northeastern portion of Moffett Federal Airfield. The portion of gas line that is of concern is the length that runs directly through the middle of a Navy solid waste landfill known as Site 2 - The Golf Course Landfill (see attachment). A multilayered cap is presently being designed to be constructed over the landfill.

The Navy requests an urgent meeting with you to discuss various options available to address this situation. The Navy is seeking "As-Built" drawings, maintenance history, and any other construction type information regarding the condition of this line. Sharing your expertise in dealing with construction around gas lines would also be greatly appreciated. We are available the week of July 8th to discuss these issues. A copy of your "As-Built" drawings prior to the meeting would also be greatly appreciated. Please contact me at (415) 244-2563 or Hubert Chan at (415) 244-2562 at your earliest convenience so that our design process may continue expeditiously.

Sincerely,
