QE:218-1

TO: Distribution

FROM: Sandy Olliges, Environmental Services Office *SO*

SUBJECT: Revised Draft Human Health Risk Assessment

Enclosed is a copy of the revised Draft Human Health Risk Assessment for the proposed NASA Research Park at NASA Ames Research Center, Moffett Field, California.

We understand EPA is adopting new TCE dose response values as provisional values to be used in risk assessments. It is our intention to add a supplement to the final HHRA showing risk based on these provisional values.

Details of the surface flux measurement program, groundwater data, and air data are available upon request. A CD containing this information will be included in the final HHRA document. Please contact David Brenner, Ph.D. by phone at (415) 884-3153 or by e-mail at [dbrenner@mactec.com](mailto:dbrenner@mactec.com).

Please provide comments by October 18, 2002. If you have any questions, I can be reached at (650) 604-3355.
