San Francisco, CA 94105

Subj: Naval Fuel Depot Point Molate, Richmond, California

Dear Ms Douglas:

This is an interim response to your letter to our Mr. Al Fung of September 23, 1993 regarding the inorganic soil contaminants in the Sandblast Grit area and the inorganic sediment contaminants in the near shorelines along the treatment ponds area.

We have started our investigation in these areas and the results are expected to be completed by August 1994. At that time we could provide you the concentrations of inorganic contaminants and background data as requested in your letter.

Should you have any questions regarding this matter, the point of contact is Commander, Western Division, Naval Facilities Engineering Command (Attn: Luciano Ocampo, Code 09ER3LO, (415) 244-2536).

Sincerely,
