Subject: Re: Concurrence with Final Technical Memorandum Bioventing/Biosparging Pilot-Scale Test, Naval Station Treasure Island dtd 31 August 2000?

Ellen,

Thanks for the prompt and sorry about the delay in responding to your request. As I stated in my comments to the draft technical memorandum, the document presents the appropriate data to support the conclusion of the pilot test. I also agree with the recommendation that this technology may be appropriate for full-scale remediation at other locations with petroleum-contaminated soil and groundwater where the lithologies are similar to Site 06.

Sarah, David,

On August 31, I sent you a letter requesting concurrence with the Final Technical Memorandum Bioventing/Biosparging Pilot-Scale Test, Naval Station Treasure Island dated 31 August 2000. Are you in concurrence with the findings and recommendation in the report?

Thank-you,

Ellen Casados
