From: Commanding Officer, Engineering Field Activity, West, Naval Facilities Engineering Command

Subj: REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS) FOR  
NAVAL STATION TREASURE ISLAND (NAVSTA TI)

Encl: (1) Draft Remedial Investigation Report Addendum No. 1,  
Contaminant Fate and Transport Modeling dtd 10 April 1997

1. Enclosure (1) is provided for your review. Please submit your comments on or before 27 May 1997. This technical addendum describes the modeling that was performed for the installation restoration sites including five petroleum sites and identifies ecological chemical of concern at each site that should be considered in the feasibility study (FS) or the corrective action plan (CAP). Please note that the modeling is conservative (worst-case scenario) and further detailed modeling may be needed in the FS or CAP to develop cleanup levels.

2. Thank you for your guidance and involvement in this project. For further information, please call me at (415) 244-2560.
