From: Commanding Officer, Engineering Field Activity, West, Naval Facilities Engineering Command

Subj: REMEDIAL INVESTIGATION/FEASIBILITY STUDY (RI/FS) FOR
NAVAL STATION TREASURE ISLAND (NAVSTA TI)

Encl: (1) Technical Memorandum, Bird Survey Results of the Validation Study for
YBI Sites 11, 28, and 29 dated 9 October 1998

1. Enclosure (1) is provided for your information. This technical memorandum summarizes the results of bird surveys conducted at sites on Yerba Buena Island (YBI) in April 1998. The report recommends the collection of tissue samples from resident prey species to quantify potential ecological risks to the Peregrine Falcon from chemicals of potential ecological concern at Sites 11, 28, and 29. Sampling will be conducted in March 1999, thus delaying the completion of the final onshore RI report. To avoid this delay, it is necessary to create a separate operable unit (OU) for YBI Sites 11, 28, and 29.
2. Thank you for your guidance and involvement in this project. For further information, please call me at (650) 244-2560.
