Subject: RE: EPA's Request for Site 27 Revised Draft FS

Patti,

I think this is a good idea. We'll incorporate the written and verbal draft comments discussed at the meeting and distribute a revised draft of the FS for formal comments.

Thanks,
La Rae

Subject: Site 27 FS Suggestion

I left a voice message about this too.

After the discussions yesterday, it might be the best use of resources to consider moving back one step by considering all comments thus far as 'agency review draft' status. Since there is major streamlining to the next revision of the document, there would be no need to undertake the time to submit comments on the present version, followed by Navy responses on things already resolved.

If this is agreeable, the agency's will receive a new version for comments to the record.

Please advise.
