Subject: RE: Comments on Draft Final Site 31 RI

Agnes,

Thanks for your review and comments. We'll better clarify that although there are not any elementary school buildings located within 100 feet of detected VOCs at Site 31, the daycare center building at Site 30 is located within 100 feet of detected VOCs at Site 31. We will also clarify the statement in section I.8.2 that elementary school receptors were excluded from indoor vapor intrusion evaluation; however, a separate indoor air vapor intrusion evaluation was conducted for the daycare center receptors (Attachment I2). Seven monitoring wells were used to characterize and conduct the fate and transport evaluation for the site, but groundwater data from six monitoring wells were used in the HHRA. We will clarify this throughout the document. Pls let me know if you have any further comments or questions. Thanks again.

VR,
La Rae Landers, P.G.
