

Facilities Integrated Logistic Support (ILS) Program

The facilities ILS program provides installation, regional and global planning for the next generation of aircraft, ships, submarines and other weapon systems. The program works upfront and early with the development, design and delivery of

new weapon platforms, ensuring both compatible and strategic placement of facilities around the globe. We get involved with planning for key supportability requirements such as operations, training, maintenance, and supply. One of our primary goals is to ensure that the right facilities are available in time, at the right base and at the right cost.

The Facilities ILS program is currently working with and supporting over 28 weapons programs, including the Joint Strike Fighter (JSF), the CVN-21 (Next generation nuclear carrier), Littoral Combat Ship (LCS), DDG-1000 (Next generation destroyer), Multi-Mission Maritime Aircraft (MMA) and several Unmanned Aerial, Surface and Sub-surface programs. We are currently working with key stakeholders planning for both long-term strategic requirements and near-term facilities such as hangers, piers, ammo/ordnance wharfs, maintenance shops, housing, simulators/trainers, warehouses, etc. Additionally, the ILS program is critical to identifying and integrating infrastructure requirements into several of the Navy's ashore programs, such as environmental, acquisition, engineering and real estate.

Our primary clients are Commander, Navy Installations Command, the Warfare Enterprises, Program Executive Offices and the Fleet. Our planners work in a diverse interdisciplinary environment and call upon a variety of skills to ensure adequate stakeholder involvement. NAVFAC ILS planners are instrumental in identifying and translating infrastructure requirements into implementing actions, providing the Navy's forces with operational, training and support facilities both at home and abroad.

Innovation, Leadership, Performance

The Naval Facilities Engineering Command (NAVFAC) manages the planning, design, construction, contingency engineering, real estate, environmental, and public works support for U.S. Navy shore facilities around the world. We provide the Navy's forces with the operating, expeditionary, support and training base's they need. NAVFAC is a global organization with an annual volume of business in excess of \$18 billion. As a major Navy Systems Command and an integral member of the Navy and Marine Corps team, NAVFAC delivers timely and effective facilities engineering solutions worldwide. Additional updates and information about NAVFAC can be found on social media sites Facebook and Twitter. Become a Fan at <http://www.facebook.com/navfac> and follow us on <http://twitter.com/NAVFAC>.
